

Lighting up
your life.

Teleco Automation offers you complete and innovative systems to turn ON and OFF appliances, adjust the light intensity and scenes, ...all wireless:

- lights for inside use
- lights for outside use
- lights for LEDs

Everything is carried out via radio frequency offering you the freedom to control any devices from anywhere in your home.
Without any construction works.

Less wires,
more value.

The true freedom of your home is represented by our Home Automation systems. Without wires. Without expensive works. Without difficult installations. Thanks to our wireless systems you will be free:

- to control via radio frequency all the electrical appliances of your home
- to send single and centralised commands from anywhere in your house
- to install all our devices without construction works

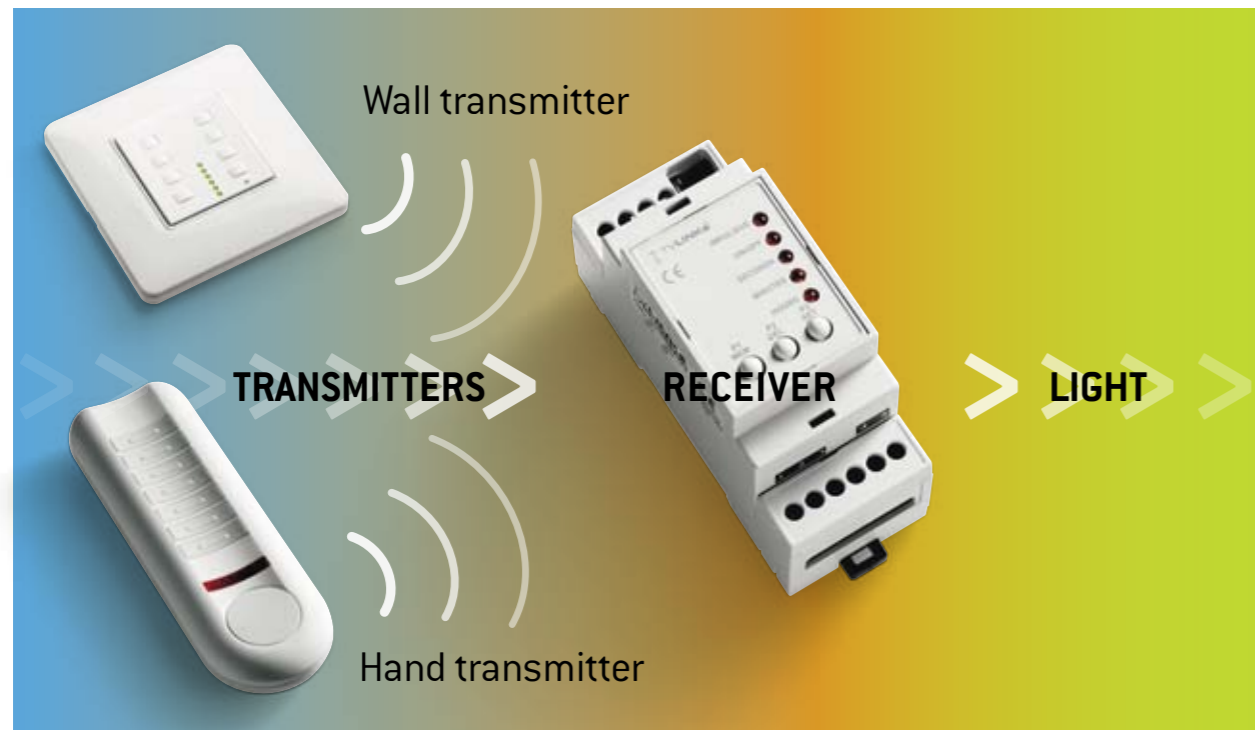

FOR THE WIRELESS CONTROL
OF **LIGHTS & LEDS**

Viale del Lavoro, 5 31014 Colle Umberto (TV) Italy Tel: +39 0438 398511 Fax: +39 0438 398536 www.telecoautomation.com

What do you need to control the lights wirelessly?

The operating system is very easy: the command will be sent via radio frequency to the receiver by a wall and/or hand transmitter. The receiver will receive the signal and control your lights as required. It is also possible to dim lights and choose various light scenes.

The product range.
