

# ASA80

Cube is cute! A subwoofer doesn't have to be an eyesore anymore. ArtSound introduces two new active loudspeakers that are true gems, packaged in a very compact cube design. The rounded corners soften the speakers' look. The 'big brother' of the pair, the ASA80, has an 8" patented driver that allows you to easily add space-filling bass to your living room. It is super easy to combine with the AS250, AS150 and others. Together with the new ASC350 center speaker and the AS350, you can even create a unique home theatre set.

COLOURS black
