## AC Triac RF＋Push Dimmer

SKU： 6365
RF dimming／Numeric display／Leading edge or trailing edge／Min brightness settable／Push Dim／Din rail

## Features

－RF＋Push AC phase－cut dimmer， 1 channel outpu．
－To dim and switch single color dimmable LED lamps， traditional incandescent and halogen lights．
－Digital numeric display，set brightness by bottons．
－0－100\％dimming smoothly without any flash．
－Reverse－phase dimming or forward－phase dimming selectable．

－Minimum brightness sef from $1 \%$ to $40 \%$
－Compatibility with all Skydance＇s 2.4 G single zone or multiple zone dimming remote contro
－Connect with external push switch to achieve on／off and 0－100\％dimming function．

## Technical Parameters

| Input and Output |  | Dimming data |  |
| :---: | :---: | :---: | :---: |
| Input voltage | 100－240VAC | Input signal | 3 Buttons <br> RF 2.4 GHz <br> AC Push |
| Output voliage | $100-240 \mathrm{VAC}$ |  |  |
| Output current | $1 \mathrm{CH}, 2 \mathrm{~A}$ | Dimming level | 100 levels |
| Output power | 200－480W | Dimming range | 0－100\％ |
| Safety and EMC |  | Environment |  |
| EMC standard（EMC） | EN 55015：2013 <br> EN 61547：2009 <br> EN 61000－3－2：2014 <br> EN 61000－3－3：2013 | Operation temperature | Ta： $30^{\circ} \mathrm{C} \sim+55^{\circ} \mathrm{C}$ |
|  |  | Case lemperature（Max．） | Tc：$+85^{\circ} \mathrm{C}$ |
|  |  | 1 Prating | ｜P20 |
| Safery standard［IVD） | EN 61347－2－11：2002 <br> EN 61347－1：2015 <br> EN 62493：2015 | Warranty |  |
| Cerification | CE，EMC，LVD | Warranty | 5 years |

Note：When calculating the maximum number of load lamps or drivers，the input power or input current parameters of a single lamp or driver must be used，the output power parameters can not be used otherwise，the product will be overloaded and damaged

TR1 AC Triac＋Push Dimme

## Mechanical Structures and Installations

1）Caution：Please carefully ensure all wire connections and polarities are correct and secure before applying power， otherwise this controller will be damaged．

Connect with dimmable LED light

## System parameter setting

- Long press $\boldsymbol{\omega}$ and - key for 2 s , prepare for setup system parameter: control method, minimum brightness curve automatic blank screen. short press $\boldsymbol{U}$ key to switch three item.
- Control method: short press - or + key to switch forward-phase|"C-F") or reverse-phase("C-R")

## Forward-phase control dimmer

Reverse-phase control dimmer

- Minimum brightness: short press - or + key to set minimum brightness,
from $1 \%$ to $40 \%$ ("b01" to"b 40 "). You need set suitable minimum brightness to avoid flick
- Automatic blank screen: short press - or + key to switch enable("bon") or disable|"boF") automatic blank screen
- Long press M key for 2 s or timeout 10 s, quit system parameter setting.

## Restore factory default parameter

- Long press - and + key for 2 s, restore factory default parameter, display"RES"
- Factory default parameter: $100 \%$ brightness, rerverse-phase control, $5 \%$ minimum brightness, disable automatic blank screen.

## Dimming by 3 buttons

- Short press U key, turn on or turn off light.

When display pencent brightness value (001~100), the light is on.
When display "bon", the light is off.

- When light is on, Press - or + key to change brightness, long press for continuous adjustment.

## Dimming by Push switch

The provided AC Push-Dim interface allows for a simple dimming method using commercially available non-latching (momentary) wall switchs.

## - Short press:

Turn on or off light.

- Long press (1-6s)

Press and hold to step-less dimming,
With every other long press, the light level goes to the opposite direction.

- Dimming memory:

Light returns to the previous dimming level when switched off and on again, even at power failure.

- Synchronization:

If more than one dimmer are connected to the same push switch, do a long press for more than 10 s ,
then the system is synchronized and all lights in the group dim up to $100 \%$.
This means there is no need for any additional synchrony wire in larger installations.
We recommend the number of dimmers connected to a push switch does not exceed 25 pieces,
The maximum length of the wires from push to dimmer should be no more than 20 meters.

## Dimming by RF remote

Match Remote Control (two match ways)
End user can choose the suitable match/delete ways. Two options are offered for selection:

## Use the Match key

Match:
Long press Match key for 2s, display "RLS"
within 5 s , press on/ off key (single zone remote) or zone key (multiple zone remote) of the remote, display "RLO", match is successful.

Delete:
Long press Match key for 5 s , until display "RLE" delete all matched remote.

## RF remote application notes

1. All the receivers in the same zone

Auto-transmitting: One receiver can transmit the signals from the remote to another receiver within 30 m , as long as there is a receiver within 30 m , the remote control distance can be limitless. Auto-synchronization: Multiple receivers within 30 m distance can work synchronously when they are controlled by the same remote.
Receiver placement may offer up to 30 m communication distance. Metals and other metal materials will reduce the range, Strong signal sources such as WiFi routers and microwave ovens will affect the range.
We recommend for indoor applications that receiver placements should be no further apart than 15 m
2. Each receiver(one or more) in a different zone, like zone 1,2,3 or 4.
