

G5

This is the most versatile loudspeaker in the Line Up series, and may be used in professional as well as residential environments. Built to last and with a timeless design.

① Thanks to a handy dial, you can switch from 8 to 16 ohm. This allows you to hook up four loudspeakers to a conventional amplifier without overloading it.

② This specially designed bracket is multi-functional. You can use it as a base, wall bracket or even as a ceiling bracket. Thanks to the ball and socket joint, you can align it in any direction you like, using each of the three options. Comes complete with screws.

Powerful, that's the G5 in one word. It can drown out any sound, no matter how intense.

COLOURS white / black

TECHNICAL SPECIFICATIONS

range	<40m ²
