# Square models

KITS

Different types of drop-in kits for Basic, Xtended and Gold series have been developed. An overview:

- For the round models this consists of a special acoustic PVC pot which fully seals the rear of the loudspeaker.
- For the square models, we have developed a customised square-shaped rear from MDF.

- For a number of models we have a special drop-in kit which enables the loudspeaker to be fitted in the wall. Thanks to the kit, you can fix the loudspeaker firmly in the wall and your adhesive is flush with the front (frame) of the inwall speaker. The DC1000 kit is even supplied with an additional PVC inwall receptacle for extra loudspeaker protection.
