

Tutto

Tutto2.1 delivers a space-filling sound whilst being very discreet. Versatile speaker set with deluxe rubber finish, for both large and small spaces. The sub-woofer with built-in filter system® can be connected to two or more satellites. applicable in low-ohm environments and professional set-ups (100V)

Satellite speakers may only be used in combination with the patented Tutto 1 sub-woofer.

We admit it. You can barely see the Tutto. This isn't that surprising considering it's only 9 cm high. Don't be fooled by its size; it produces superior timbre.
